Portfolio: minn-portfolio-v2-production.up.railway.app

PROFESSIONAL SUMMARY

Mobile engineer specialising in Flutter and Dart, with freelance development experience since 2021 and a current Senior Flutter Developer role at Joy Groups International. Work spans video streaming, delivery, commerce, learning tools and Bluetooth-connected inventory applications. Develops mobile interfaces, integrates APIs and native capabilities, and builds supporting React and Node.js services. Interested in mobile engineering opportunities in New Zealand.

CORE SKILLS

Flutter and Dart | Riverpod and BLoC | REST API integration | HLS playback | BLE and RFID | Firebase and notifications | Android and iOS release preparation

PROFESSIONAL EXPERIENCE

Senior Flutter Developer | Joy Groups International

Apr 2024 - Present | Remote, Bangkok

- Developed DMS Rider request and payment screens, API-backed dashboard flows, notification handling and localisation; refined location socket behaviour around navigation and online/offline state.
- Implemented ETMS Driver interfaces from Figma, including passenger and boarding flows, camera and QR-scanner interactions, and multilingual screens.
- Built stock-record workflows, responsive forms, image selection and chatbot interfaces for the One Stock AI Merchant frontend prototype. Contributed to checkout, stock selection and rider availability in companion e-commerce apps.

Flutter and Node.js Developer | Freelance

Dec 2021 - Present | Remote, alongside employed roles

- Developed mobile applications and supporting systems for PerseusTV+, EZ RFID Check, Shwemi, Studinote, Live Translator, and HR and Workforce Management.
- Worked across the PerseusTV+ Flutter viewer, React creator and operations dashboards, Node.js services and HLS media delivery; built download.perseus-tv.app.
- Integrated device input, audio, authentication and APIs into product workflows, with explicit loading, failure and recovery states.

Flutter Developer | Lastoenjoy Co Ltd

Nov 2022 - Apr 2024 | Remote, Mandalay

- Built and maintained Flutter product interfaces and application features.

SELECTED FREELANCE PROJECTS

Public store figures checked 23 September 2026.

PerseusTV+

- Developed and maintained an Android and iOS streaming app with 10,000+ Google Play downloads. Implemented bounded playback retries, local resume, ordered cloud progress updates and server-authorised playback sessions.

[Google Play](#) | [US App Store: 4.8/5 from 12 ratings](#)

EZ RFID Check

- Built a Flutter BLE/RFID inventory app published on Android and iOS, with 500+ Google Play downloads. Connected scanner input to stock review and exportable reports using Riverpod, Dio and Retrofit.

[Google Play: Easy RFID Check App](#) | [App Store: EZ RFID Check](#)

Studinote

- Developed language-learning screens, generated-note and dictionary API integration, authentication and audio features for Studinote, published on Android and iOS.

[Google Play: 10+ downloads](#) | [App Store: Studinote](#)

Shwemi

- Built Flutter administration workflows for gold retail, including daily prices, buyback pricing and QR scanning connected to APIs through shared application state.

Live Translator

- Integrated audio capture, translation requests, speech playback and transcript export for Burmese-Thai conversations, with a web experience and native iOS audio integration.

HR and Workforce Management

- Developed a local-first React and NestJS system for personnel, attendance, leave approvals and reporting, with role-based access, exports and Windows delivery.

TECHNICAL SKILLS

Languages: Dart, TypeScript, JavaScript.

Mobile: Flutter, Riverpod, BLoC, GoRouter, Dio, Retrofit, media_kit, flutter_blue_plus, Firebase and FCM.

Web and backend: React, TanStack Query, Tailwind CSS, Node.js, Express, NestJS, PostgreSQL, MongoDB, SQLite and TypeORM.

Cloud: AWS (Amazon S3, Amazon CloudFront, Amazon SES) and Railway.

Delivery and integration: Git, GitHub, HLS, object storage, Socket.IO, BLE, QR scanning and mobile release workflows.

AI-assisted development: Codex for implementation planning, debugging, refactoring and test development, with code review and build/runtime validation.

EDUCATION AND CREDENTIALS

BSc (Hons) Computing | University of Greenwich

Expected January 2027

Computer Science Studies | University of Computer Studies, Yangon

Studied through semester 7

Meta Android Developer Professional Certificate | Coursera

Issued Oct 2024
